

The 3 ranges

Hardwood

Hardwood provides you the ultimate in custom hand-made wine storage, creating a stunning look and feel for your cellar. These are natural materials so colours and grain vary from batch to batch, and is available in White American Oak, Black Walnut and Ash.

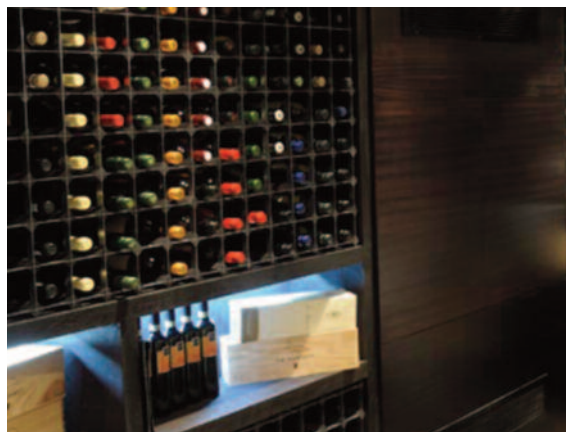

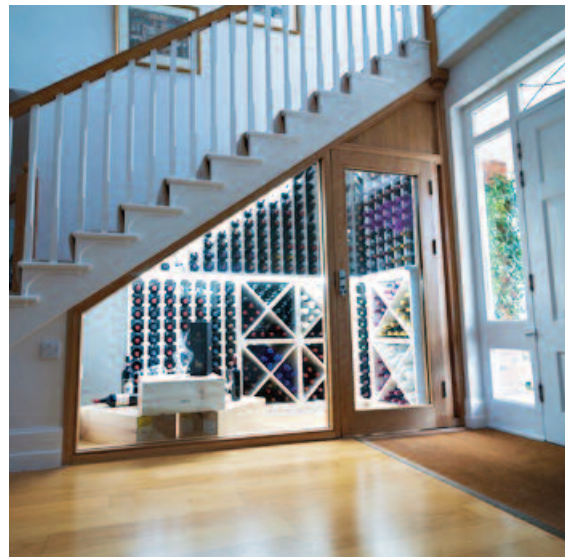

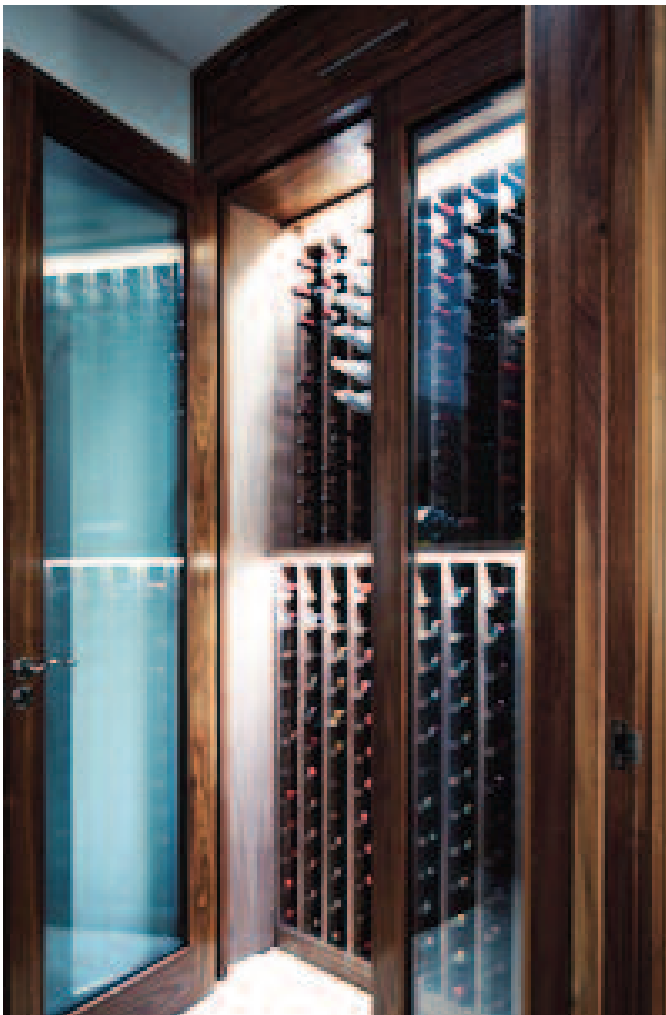

Hardwood storage can be supplied lacquered or oiled to further enhance and protect your racks.

Redwood

These racks are hand made from the finest quality redwood pine and can be supplied as natural unstained pine or in any of these colours: Weathered Oak, Black Ash, Dark Oak and Light Oak.

Traditional Wood

Our traditional wooden wine racks are practical, durable and attractive. They are constructed from quality solid pine blocks and bright-galvanised steel. These racks provide exceptional durability and can be used in any number of configurations or combined with other storage solutions. Racks are typically wall mounted, ideal for under stairs and alcoves and you can choose from Weathered Oak, Black Ash, Dark Oak and Light Oak colours.

Storage options

Wood Racks

Our racks are made to measure with options to accommodate different bottle types including half, standard and magnums. Our double depth rack allows two bottles to sit one behind the other. Racks can be customised to your specification and combined with other storage products as part of a complete cellar installation. Every rack is manufactured to order, hand made in the UK.

Wood Case Racks

If your collection contains wine cases then our case racks are an ideal way to store and display them. Each unit has two sliding shelves and can be supplied in different widths, and used as singles or combined to increase storage capacity. Each unit is designed to hold cases of 12 standard bottles and comes with sliding shelves for easy access.

Wood Cubes

If you're looking for something a bit different, storage cubes can be combined with other options to form a complete cellar solution. These cubes accommodate up to 24 bottles. They are ideal for storing batches of the same wine as they provide the maximum bottle density of our storage range and are an alternative to the more traditional types of wine storage. Cubes are constructed from quality solid hardwood and have cross members that are mitred into the corners to provide strength and a clean quality finish.

Additional features

Acrylic Display

This construction uses our hardwood range for the framework to ensure integrity, with supports laser cut and polished from crystal clear acrylic. This gives a contemporary look to your storage system and the clear structure allows for the full impact of decoration and lighting systems. Our acrylic bottle displays, set at a 35 degree angle, highlight the bottle label while allowing the wine to be in contact with the cork.

LED Lighting

Give your cellar a soft ambient look that doesn't generate heat or effect the condition of your wine. Our LED lighting can be concealed into the shelf divide, in the middle of racking, or at the top of racking by way of metal clips or routed wood sections.

Mirror Acrylic

Give your wine display a dramatic effect which enhances the atmosphere and adds depth to the room. This is achieved with mirror acrylics, available in silver and gold options, that are fitted to either the wall or backs of the racking.

Wine Cellar Climate Control

Storing your wine in the right environment is essential for protecting quality. We can supply and install cooling units and cellar conditioners to suit your specific requirements. We'll conduct a survey of your cellar or basement and provide a formal costed recommendation for a cellar cooling solution.

Wine Storage

Our fitted wine storage collection allows you to create a bespoke solution for your wine, as these racking systems can be built anywhere there's a space; in a cellar, under the stairs or as part of a kitchen design. There's even a special scallop-shaped solution to fit into spaces where there's little depth, such as behind a door. At the other end of the scale, you can have a temperature-controlled cellar specially built.

All storage solutions are designed to make sure all types of wine are kept correctly to help maintain quality and taste. The racking is handcrafted in the UK for us, using the finest quality FSC and PEFC-certified wood from renewable sources worldwide.

Choice of 3 ranges

TRADITIONAL

This range is made from Swedish pine, available in 5 colours (plus a natural finish) with a metal structure. It has a full bottle depth of 300mm, allowing the bottles to rest on the wood and not the metal structure, and enabling maximum airflow around the bottles. You can buy this range as single bottle holders, or hundreds, depending on what combination you need. You can also opt to fit this range yourself.

REDWOOD

The solid redwood range offers an open and tailored look to your wine storage area. It's available in 5 colours plus a natural finish to fit in your home surroundings.

HARDWOOD

Solid hardwood storage gives you flexibility and practicality for your wine storage as well as providing a fitted furniture showpiece. Choose from natural white American Oak, Black Walnut or Ash.

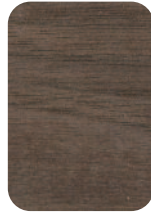

For all 3 ranges, we offer a measuring service for a minimum of 750 bottles (Traditional range) or 500 bottles (Redwood and Hardwood ranges), otherwise, we can supply to your own measurements.

The fitting service is priced according to the size of the job. You can also fit the Traditional wine storage yourself if you wish.
